Our responsibility was to express an opinion on the consolidated financial statements based on our audit. Our procedures did not extend to supplementary information that does not have an impact on the consolidated financial statements taken as a whole.

To the Supervisory Board of Grupa LOTOS S.A.

In addition, the Company’s Management Board and Members of the Supervisory Board are required to ensure that the attached consolidated financial statements and the Directors’ Report meet the requirements of the Accounting Act dated 29 September 1994 (2009 Journal of Laws No. 152 item 1223

with subsequent amendments – ‘the Accounting Act’). Our responsibility was to audit the attached consolidated financial statements and to express an opinion on whether, based on our audit, these financial statements comply, in all material respects, with the required applicable accounting policies and whether they truly and fairly\(^3\) reflect, in all material respects, the financial position and results of the operations of the Group.

3. We conducted our audit of the attached consolidated financial statements in accordance with:
   - chapter 7 of the Accounting Act,
   - national auditing standards issued by the National Council of Statutory Auditors,

in order to obtain reasonable assurance whether these financial statements are free of material misstatement. In particular, the audit included examining, to a large extent on a test basis, documentation supporting the amounts and disclosures in the attached consolidated financial statements. The audit also included assessing the accounting principles adopted and used and significant estimates made by the Management Board, as well as evaluating the overall presentation of the attached consolidated financial statements. We believe our audit has provided a reasonable basis to express our opinion on the attached consolidated financial statements treated as a whole.

4. The consolidated financial statements for the prior financial year ended 31 December 2011 were subject to our audit and on 17 April 2012 we have issued an unqualified opinion with an emphasis of matter on these financial statements concerning the uncertainty indicated by the Company’s Management relating to the recoverability of the assets recognized due to the purchase of interest and exploration expenses incurred in respect of the YME oil field.

5. In our opinion, the attached consolidated financial statements, in all material respects:
   - present truly and fairly all information material for the assessment of the results of the Group’s operations for the period from 1 January 2012 to 31 December 2012, as well as its financial position\(^4\) as at 31 December 2012;

Due to the previously recognized write-offs of capital expenditures incurred on YME project as well as previously incurred tax losses, as at 31 December 2012 deferred tax asset recognized in the consolidated financial statement of financial position amounts to 1077 million zloty. Without qualifying our opinion, we draw attention to the uncertainties indicated by the Company's Management concerning recoverability of the remaining assets recognized in the attached consolidated financial statements in respect of the YME project due to the fact that the forecasts and the Company’s plans are determined by a series of futures events, in particular, by estimates of market values of hydrocarbons’ reserves on YME field as well as the results of the final agreement announced on 12 March 2013 between YME Operator and the supplier and contractor of a drilling platform, which is described in note 38 of explanatory notes relating to post balance sheet events.

### Comments

The following trends may be observed based on the above financial ratios:

All of the profitability indices increased in 2012 in comparison to 2011. It was caused by the increase in net profit and sales revenues together with simultaneous slight decrease of the total assets and significant equity increase.

Return on assets ratio amounted to 3.8% in 2010, then has decreased by 0.6 percentage point to the level of 3.2% in 2011, and increased in 2012 to the level of 4.6%. Return on equity ratio has increased to the level of 11.9% in 2012 from the level of 8.6% in 2011 (in relation to 2010 year increase by 1.9 percentage point). Profit margin amounted to 2.8% in 2012 and it was higher than in 2011 (2.2%) and lower than in 2010, when amounted to 3.5%.

Liquidity I ratio increased to the level of 1.53 at 31 December 2012 in comparison to previous year, when it amounted to 1.29 at 2011 year end and 1.33 at 2010 year end. The increase was caused by a decrease in short term payables combined with a slight decrease in working capital.
4.2. Comments (continued)

Liquidity III ratio was declining systematically from 2010, when at the years 2010, 2011 and 2012 amounted to: 0.07, 0.06 and 0.05 respectively. The decrease of this ratio mainly resulted from lower level in short term liabilities and cash which was caused by partial repayment of capital of inventory facility.

Debtors days ratio decreased in years 2010-2012, it amounted to 32 days in 2010, 26 days in 2011 and 18 days in 2012. The reason behind these trend is increase in net sales in comparison to the amount of short term receivables which decreased in 2012. Credit days ratio was shortened: in 2010 and 2011 it remained at a similar level (36 and 37 days), whereas in 2012 it amounted to 25 days, due to the decrease in current liabilities with simultaneous increase in operating costs. The inventory days ratio maintain the similar trend- decrease over 2010-2012, from 89 days in 2010, 76 days in 2011 and 68 days in 2012. Indicated trend is the result of faster growth in the level of operating expenses in relation to the increase in the value of inventories.

The Group’s stability of financing ratio and the debt ratio at 31 December 2012 indicate decreasing debt financing level in comparison with the prior periods. The debt ratio was increasing years 2010-2011 from the level of 57.6 % at 2010 year end to the level of 61.9% in 2011 and it decreased to the level of 54.8% at 31 December 2012 as the result of the decrease in total liabilities.

The Group’s stability of financing ratio and the debt ratio at 31 December 2012 indicates the higher share of the constant capital in the Group’s financing structure in comparison to the comparable position at the end of previous years. The Group’s stability of financing ratio at 2010 year end amounted to 70,9%, then decreased by 4.2 percentage point to 66.7% at 2011 year end and at 31 December 2012 increased to the level of 72,2%.

4.3 Going concern

Nothing came to our attention during the audit that caused us to believe that the holding company is unable to continue as a going concern for at least twelve months subsequent to 31 December 2012 as a result of an intended or compulsory withdrawal from a substantial limitation in its current operations.
